IMPACT REPORT

Wum Water Project: 2025 impact

What changed

Before: most households walked over an hour to a stream.
Now: the average walk to safe water is under five minutes.
Each tap is run by a village committee that collects small fees for repairs.

How we know

Committees log repairs and fees monthly. Our team visits each point twice a year.

Measure	2024	2025
Taps working	0	15
People served	0	2,250
Average walk (min)	75	4
